User Account Control Settings

Choose when to be notified about changes to your computer

User Account Control helps prevent potentially harmful programs from making changes to your computer.
[Tell me more about User Account Control settings](#)

Always notify

Never notify

Never notify me when:

- Programs try to install software or make changes to my computer
- I make changes to Windows settings

i Not recommended. Choose this only if you need to use programs that are not certified for Windows 7 because they do not support User Account Control.

OK Cancel

Select "Never Notify" by Scrolling down the bar.

Control Panel Home

Allow a program or feature through Windows Firewall

Change notification settings

Turn Windows Firewall on or off

Restore defaults

Advanced settings

Troubleshoot my network

Help protect your computer with Windows Firewall

Windows Firewall can help prevent hackers or malicious software from gaining access to your computer through the Internet or a network.

[How does a firewall help protect my computer?](#)

What are network locations?

Home or work (private) networks	Connected
Networks at home or work where you know and trust the people and devices on the network	
Windows Firewall state:	On
Incoming connections:	Block all connections to programs that are not on the list of allowed programs
Active home or work (private) networks:	GNFC
Notification state:	Notify me when Windows Firewall blocks a new program
Public networks	Not Connected

Action Center

Network and Sharing Center

6:18 PM
8/30/2010

Now select the "Turn Windows Firewall on or off"

Customize settings for each type of network

You can modify the firewall settings for each type of network location that you use.

What are network locations?

Home or work (private) network location settings

- Turn on Windows Firewall
 - Block all incoming connections, including those in the list of allowed programs
 - Notify me when Windows Firewall blocks a new program
- Turn off Windows Firewall (not recommended)

Public network location settings

- Turn on Windows Firewall
 - Block all incoming connections, including those in the list of allowed programs
 - Notify me when Windows Firewall blocks a new program
- Turn off Windows Firewall (not recommended)

Select "Turn off the Windows Firewall" and click "OK"

OK Cancel
